

HERE Products and Platform

GIS

GIS: Geospatial data for your internal visualization, analysis, and decision support needs.

Use HERE Map Data in your geospatial applications to support enterprise business and operational functions, such as:

- Facility and Asset Management
- Work Management and Field Operations
- Outage Management and Restoration
- Design and Engineering
- Mobile
- Marketing and Serviceability
- Environmental, Land, and Natural Resource Management

HERE has data that fits your needs:

- **HERE Base:** for display purposes – includes street data
- **HERE Standard:** for geocoding applications – includes street data, block and actual address ranges and POIs
- **HERE Premium:** for routing applications – includes street data, block and actual address ranges, POIs and all the files/content necessary for routing
